**WELL INVESTIGATION PROGRAM—SUPPLEMENTAL SUBSURFACE INVESTIGATIONS AT
1200 S. FLOWER ST., BURBANK, CA., (FILE NO. 109.0582)**

Reference is made to your consultant's, Environ, letter dated February 1, 1996, containing information on future site assessment activities for the subject site. Your consultant proposes to install seven soil borings and thirteen additional ground water wells which include six perched zone, four A-Zone, and three B-Zone monitoring wells to help further characterize the unsaturated and perched zones underlying the subject site.

We have reviewed the proposal and information obtained up to date and since this additional investigation can aid in the evaluation of soils and ground water contamination underlying the investigated areas, we have no objections to its implementation provided that all work is completed according to the previously approved work plans and complies with all Regional Board subsurface investigation requirements. Furthermore all soil and ground water samples submitted for chemical analysis must comply with this Regional Board's "Laboratory Requirements for Soil and Water Sample Analyses."

As indicated in the proposal the results, including boring logs and analytical data, from the above-mentioned investigation must be integrated into the conceptual model of the site and submitted to this Regional Board.

Please notify Board Staff at least 72 hours in advance before commencing any field activities, so we may schedule a representative to be present.

If you have any questions, please contact Ms. Ana Veloz at (213) 266-7590.

A handwritten signature in dark ink, appearing to read 'Gregg Kwey'.
